Centlenen:

I an writing this because I have sighted the second "object" recently. The first one I saw was January 25, 1967 at about 10 or 10:30 P.M. I had just retired and was looking at the sky as the stars were so beautiful, when all of a sudden I saw what appeared to be a cloud about the size of a small house. That attracted my attention was that it gave off a glow rather soft. I got up to see it better as it moved along, slowly, I should say about 25 miles an hour. I could not believe by eyes! It was about 40 feet high and quite clear. It made no noise at all. I called my wife to come and look, and we both watched, as it moved slowly away. We stood and watched it for about five minutes or so, untill it dissappeared from view. It moved out toward the ocean which is about 2 miles west of our home.

This morning as I was looking out the window again, I saw an "object", the same type as the first, moving across the sky at a distance of about a mile orlaway. It also was aglow, and I watched it for about live minutes, going in the opposite direction. It was about 6 o'clock A.M. the stars were still out and it was just beginning to set light.

We are sincere about this, my wife and I are both church members, and have been for years. We cannot account for this and thought you may have an answer.

I have just read "America's Big Eye On the Sky" in the Reader's Digest, which prompted me to write about this to you.

I am recired and have worked for twenty-three and a half years for N.A.S.A. Moffett Field, California. I was forman of the missle devision, so you can understand my interest in this matter.

to the Sen Francisco Peninsula after February 23rd. Our new address will be 285 to this letter.
